

A Citizen's Perspective

A Monthly Forum to Discuss Current Issues

Monday February 11

7:30 – 9pm at the Tredyffrin Library

582 Upper Gulph Road, Wayne

Coastal Flooding in the US

Along nearly 13,000 miles of coastline of the contiguous United States, hundreds of thousands of buildings lie in the path of rising seas: schools, hospitals, churches, factories, homes, and businesses. Long before these properties and infrastructure are permanently underwater, millions of Americans living in coastal communities will face

more frequent flooding, as the tides inch higher and reach farther inland. As sea levels rise, persistent high-tide flooding of homes, yards, roads, and business districts will begin to render properties effectively unlivable, and neighborhoods—even whole communities—financially unattractive and potentially unviable.

Please join us as we discuss the problems of Coastal Flooding, how it is being inadequately dealt with across the country and what can and should be done.

Coastal Flooding in the US

Monday February 11

7:30 – 9pm at the Tredyffrin Library

The session will start at 7:30pm, but we have the room starting at 7:00pm, so, please come a few minutes early for some casual discussion.

Please feel free to share this invitation broadly—all are welcome. We hope you can join us...and bring a friend or two.

Any questions, please contact Jerry Henige, jhenige@verizon.net, 610 341-0756
